

EMR Components Designed For Long Term Care

## Full ADL Capture, Weights, Meal and Fluid Intake plus more.

The new generation of Medeasy software has been created to adapt to the changes your skilled nursing facility faces everyday as the profession moves one step closer to an Electronic Medical Record (EMR).

### GMAX Features Include:

- On-Demand and Web Based.
- Touch screen application design for fast efficient entry.
- Exception reporting to identify un-documented care.
- Performance reports to identify who is providing care to what resident.
- Easy to use interface with on-screen help.
- Capturing MDS Items G0110A – G0110J
- Capturing Meal and Fluid Intake information
- Capturing Weights

### Why Medeasy:

- We are willing to integrate with other software you may have as we are flexible in our data integration to accommodate your communications needs.
- Low start up cost and operates for less than 10 cents per available patient day.
- You don't need an entire EMR to take advantage of on-demand ADL capture.
- We're web based so we provide you greater flexibility in hardware options.
- Even with a poor internet connection we can help you work around that so you can take advantage of the web browser experience.
- Our ADL capture is automatically integrated with our MDS 3.0

## EMR Components Designed For Long Term Care

- Easy to use interface designed to show you what categories you want to access with just a touch. Plus you always know what 2 people had information entered on their behalf, last.

- Choose ADLS to work through all the resident's ADLs (G0110A-J) or choose 1 ADL for those times as needed.

## EMR Components Designed For Long Term Care

- Enter Meal and Fluid intake individually or together.

Barnes , Mildred  
Room:

Enter Fluid Intake (In CCs), SELECT Meal and Enter Meal Intake

Fluid Intake (In CCs)

1	2	3
4	5	6
7	8	9
0	CLR	

Meal Intake

1	2	3
4	5	6
7	8	9

### Future GMAX3 Enhancements Include:

- Bowel and Bladder Documentation.
- Restorative documentation.

### GMAX Matrix Reporting:

- All ADLs can now be documented including identifying full sets of ADLs or just a single ADL.
- The exceptions reporting looks at 4 entries per 8 hour shift per resident. An entry is defined as the full ADL set.
- It will be easy to tell how many full ADL sets have been entered on each resident across all 3 shifts.
- Fluid intake reporting shows who entered the information and the amount of fluids that were consumed.
- Meal intake reporting shows who entered the information, how much was taken, if applicable was a substitute offered and how much was consumed.
- Reporting can include the entire facility or an individual resident over any time frame (range of dates).
